

Adjustable Jet Nozzles

Description

For supply air, our adjustable jet nozzles are particularly suitable for air distribution in large halls and factories. Usually fitted into sidewall applications to enable manual adjustment of air direction to suit customer requirements.

Construction

From spun aluminium with a polyester RAL 9010 paint finish.

Size

Available in 160, 200, 250, 315 and 400 neck diameters and from 1 to a maximum of 4 multiple units in width.
